**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,3,5-7 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Beck (US 6102423).

Beck shows a backing mirror assembly including mirror(323) and substrate(302), shaft(37) coupled to the substrate, angulated position holder(36) formed with discrete stepwise meshing components (ridges and grooves--35a,36b) and capable of consistent discrete stepwise movement (via these ridges and grooves), and support structure arm(301) coupled to the substrate, wherein the position holder is rotatably coupled to the substrate (item 36 is rotatably coupled to the substrate) and adapted (see hole 38) to receive the shaft and is located between the substrate and support structure to facilitate rotational movement of the substrate relative to the support structure (e.g. figs. 12-16), wherein the mirror is capable of

Art Unit: 2872

being rotated for alignment. Beck further shows a suction cup(312) and that the support structure is "adapted" to fit on either a tail gate or bumper (e.g. via the suction cup).

Regarding claim 27, Beck's mirror may be rotated via the meshing components between positions considered to be "reference" and "viewing" positions.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Beck in view of Howard (US 5784213).

Beck does not show the support arm to be foldable. However, such is shown by Howard in figs. 4 and 5. It would have been obvious to make Beck's arm foldable as taught by Howard in order to enable compact storage of the device.

Art Unit: 2872

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Beck in view of Staggs (US 5482310).

Beck does not show the support structure to include an adjustable slide rail to facilitate height adjustment. However, such is shown by Staggs in fig. 4. It would have been obvious to the ordinarily skilled artisan at the time of invention to include Staggs' height adjustment structure in Beck's device in order to enable adjustment of the mirror height allowing for use on different vehicles.

#### ***Response to Arguments***

4. Applicant's arguments have been fully considered but they are not persuasive.

Applicant has argued that Beck fails to show the meshing components as currently claimed.

However, Beck is seen to include such structure as set forth above in the rejection. Note meshing components 35a, 36b which are cooperating ridges and grooves which enable discrete, stepwise movement of the mirror substrate.

#### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2872

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
